| D3 | Node JS | Express | MongoDB | Prisma | Vue | Redis | AWS: S3 | Lambdas | Firebase |

| Postgres |

EXPERIENCE

05/2021 - Present

Toronto, ON

Senior Applications Developer

Deloitte

- Spearheaded end-to-end development of Sleep Country Canada's e-commerce website using ReactJS, TypeScript, and REST APIs, resulting in 30% increase in website traffic by optimizing performance, implementing a responsive design, and improving SEO.
- Reduced processing time by 40% by replacing manual workflows with an automated internal claims platform for the Labour Market Services Ministry(Gov of BC), improving efficiency across various benefits and services.
- Built data-driven dashboards for government officials, enabling real-time analytics, automating manual workflows, and enhanced decision-making.
- Managed a portfolio of five applications serving over 5 million end-users, ensuring performance, scalability, and continuous improvements.

07/2020 - 03/2021

Montreal, QC

Software Developer - Product Team

Planned

- Contributed to the future of corporate event planning as part of the core product team, utilizing React (Next.js), TypeScript, and Firebase Cloud Functions to build robust, scalable solutions.
- Led the migration from Create React App to TypeScript with Next.js, improving scalability and performance, reducing load times by 40%, while phasing out legacy application.
- Reduced manual intervention by 70% through the automation of event booking workflows, integrating vendors with clients directly.
- Established a vendor marketplace with a target to engage 10000+ vendors, akin to Airbnb's platform model.

11/2019 - 05/2020

Montreal, QC

Software Developer - Global Services

Appnovation

- Played a key role in the development and ongoing support of the Freedom Treks and Ski Safari web applications, collaborating within a larger team to enhance user experiences and functionality.
- Developed the UI for Visit California's road trips section using React, Gatsby, Mapbox, creating an engaging, user-friendly interface for travelers to explore road trip options.

EXPERIENCE

02/2019 - 05/2019

Montreal, QC

Full Stack Developer

Cinco

CINCO

- Developed the homepage of Cinco, implementing SEO optimizations that increased website traffic by over 50%.
- Built a digital platform to automate inventory management for the agency using React, Node.js, and MongoDB, streamlining operations and improving efficiency.

08/2017 - Present

Montreal, QC

Freelance & Open Source Developer

- Secured $500K additional funding for 3 start-ups by providing expert technical guidance.
- Coordinated a small development team, ensuring project deadlines were met and quality standards were maintained.
